Labels play a critical role in patient health & safety, as well as having an impact on both institution & provider reputations.

- Enhance patient care: warning labels, prescription alerts, allergy notifications
- Thermal or direct transfer stocks: print patient information on site
- Consecutive numbering & barcode labels: identify equipment across departments and patient ID
- Tamper evident stocks for security
- Durable stocks & finishes for abrasive & harsh environments
- Promotional & community event giveaways: parades, blood drives & health fairs
